

WHAT MY GUARDIAN DID FOR ME!

She listened to my opinions and thoughts and did not dilute them.

She spoke to me alone, so I could speak freely.

She was supportive and I trusted her to make the correct decision for *me*.

She wrote her records in a positively worded and structured manner that gave context to situations. This made them easier for me to read years later.

She told me some of the context outside of the records regarding her interactions with others for clarification on her decision making.

She was able to read between the lines with my moods and changes but my social worker couldn't.

She had no gender bias towards my dad; my preferred parent.

I WASN'T JUST HER JOB!
